Dear Parents/Guardians:

Re: In-school vaccine clinic for St. David students and staff on Friday, September 24, 2021

Keeping our schools open for in-person learning for the full school year is a top priority for the HWCDSB. As the Delta variant continues to circulate locally and we see the challenges it has caused elsewhere, particularly among the unvaccinated, we all have a job to do in protecting those that can't be vaccinated, including children under 12.

To provide easy access to a vaccine, the HWCDSB has partnered with Hamilton Public Health Services to hold a COVID-19 vaccine clinic at **Cathedral High School** on **Friday, September 24, 2021**, from 1:30-4pm, and 5-7pm. The clinic is available to **eligible students (born 2009 or earlier), families and staff from St. David Catholic Elementary School**. First and second doses of a COVID-19 vaccine are available. Walk-ins are welcome. No appointments necessary.

Individuals experiencing symptoms of COVID-19 should not attend the clinic.

What to bring with you:

- Your health card/Ontario Health Insurance Plan (OHIP) card, or, if unavailable, any form of government-issued photo ID (driver's license, passport, Status card, birth certificate, etc). You can also ask your principal to provide an official letter with your name, date of birth and address.
- Immunization record, if available, to keep track of the COVID-19 vaccine.
- Proof of COVID-19 immunization from first dose, if available and applicable.
- An [allergy form](#), if you are allergic to a [component of your vaccine](#).
- Any assistive devices needed.
- Mask that covers the mouth, nose and chin.
- A support person, if required (parent/guardian, interpreter, etc.)

For information on youth vaccines: [Vaccine information for youth born in 2009 or earlier](#).
